CHARDONNAY IN BURGUNDY ILLUSTRATED THROUGH A BLIND TASTING OF 10 WHITE WINES

Discover how Chardonnay produces some of the world's greatest white wines and why Burgundy remains its most iconic expression. During this private tasting experience, we invite you to explore the fascinating world of Burgundy white wines. From Chablis to Pouilly-Fuissé, you will learn how terroir shapes the character of each wine while developing a structured and effective tasting methodology. This experience is designed for both curious wine enthusiasts and passionate collectors wishing to deepen their understanding of Burgundy's finest white wines.

Around our tasting table, we begin by exploring the essential foundations of Burgundy white wines. This first part of the session is highly interactive and encourages questions, providing a clear and practical understanding of Burgundy's vineyards, appellations and terroirs. We then introduce a professional tasting methodology specifically adapted to white wines.

The practical tasting forms the heart of this experience. You will take part in a blind tasting of 10 carefully selected white wines sourced from 10 different wine estates. With all labels concealed, the exercise encourages an objective approach and allows participants to focus entirely on the intrinsic qualities of each wine. This tasting highlights the remarkable richness of Burgundy's great white wines and demonstrates how a single grape variety can produce an extraordinary diversity of styles, aromas and textures depending on its terroir of origin.
